

P1-MMXP/MMXPRA-RG316-18

RF cable assembly, MMCX plug straight to MMCX plug right angle, RG-316 flexible coax, 18 inch.

Product Features

P1-MMXP/MMXPRA-RG316-18 is a 50 Ohm RF cable assembly that is part of P1dB's RG series flex cables.. It is an 18 inch MMCX straight plug (male) to MMCX right angle plug (male) cable assembly that utilizes RG-316 RG Type Flex coax, which is 0.098 inches in diameter. This RG Type Flex cable operates to 6 GHz with a max VSWR of 1.35:1.

P1dB's RG Type Flex cable assemblies are general purpose commercial grade cables that meet dimensional and electrical specifications of QPL cables. RG Type Flex cables can operate up to 6 GHz, depending on the installed connectors. The advantage of RG type commercial cables over QPL cables is their lower cost, since they do not go through the stringent environmental, mechanical and certification testing required for military grade, QPL equivalents.

Electrical Specification: T_{Ambient} = 25° C
