

SMA Male to SMA Male cable using RG-316 RG Type Flex Coax, 10 inches long, and Operating to 6 GHz. Passivated stainless steel connectors.

Product Features

P1-SMAP/SMAP-RG316-36S is a 50 Ohm RF cable assembly that is part of P1dB's RG series flex cable assemblies. It is a 36 inch flexible cable with SMA Male to SMA Male passivated stainless steel connectors. This RG Type Flex cable operates to 6 GHz with a max VSWR of 1.35:1. P1dB's RG Type Flex cable assemblies are general purpose commercial grade cables that meet dimensional and electrical specifications of QPL cables. RG Type Flex cables can operate up to 6 GHz, depending on the installed connectors. The advantage of RG type commercial cables over QPL cables is their lower cost, since they do not go through the stringent environmental, mechanical and certification testing required for military grade, QPL equivalents.
